

# Round Table

## Awnless Triticale

- **Boot stage silage, mid April harvest**
- **High protein, high palatability**
- **Heavy, late tillering, high yielding**
- **Well suited for hay**

With excellent research and superior genetics, TriCal® has taken winter cereal production to a whole new level. Roundtable is a blend of three awnless varieties with different maturities. All three of these varieties are top producers and have excellent nutritional characteristics. When a grower needs a winter cereal crop with a wide harvest window, superior standability, and vigorous early growth, Round Table is the best option. Round Table has the ability to make high quality silage and also can be harvested for hay. The harvest period for silage and hay starts in the middle of April and extends well into late May. Quality, production, and versatility make this blend an excellent option for Central California growers.

### Agronomic Traits:

Early Seedling Vigor:	Very Good
Lodging:	Moderate
Maturity:	Mid-April for boot stage harvest
Plant Color:	Dark Green
Head Color:	Grey Green
Awn Type:	Awnless

### Planting Rates:

Bushel weight:	56 lbs.
Seeds per Pound:	12,000
Rate (lbs/acre):	110 - 125

### Adaptation Ratings:

Photosynthetic Type:	Cool Season
Photoperiod:	Insensitive
Water Requirement:	Low

### Crop Use Information:

Life Cycle:	Annual
Ease of Establishment:	Good
Drought Stress:	Excellent
Wet Soil:	Good
Saline Soils (White Alkali):	Moderate
Saline - Sodic Soils (Black Alkali):	Moderate
Lagoon Water Tolerance:	Very Good
Hay:	Yes
Silage:	Excellent
Palatability:	Excellent
Anti-Quality:	Nitrate*

\*Test for nitrate in "boot stage" forage silage production.

### Disease/Insect/Nematode Ratings:

Stripe Rust:	MR
Leaf Rust:	R
Barley Yellow Dwarf Virus:	MR

Note: Ratings are based upon a number of years testing in numerous locations. Adverse environmental conditions and planting dates may alter a variety's performance, maturity, and resistance to certain diseases and insects.
