Management Practices

Seeding Rates and Depth

For forage production, target:

- 1.2 to 1.3 million seeds per acre drilled
- 1.3 to 1.5 million seeds per acre broadcast

For best consistency, plant at:

- 1½ inches deep

Uniform depth supports uniform emergence—and uniform stands drive yield. Get out and verify planting depth in the field by checking your drill depth. Do not assume drill settings equal actual depth.

Why Growers choose Gainer™

The fastest-maturing triticale on the market—giving you an earlier harvest window without giving up forage potential. Excellent for double cropping.

Early Maturity

Get to harvest sooner and open the window for your next crop.

Excellent stem-to-Leaf Ratio

More leaf. More quality. More value for your herd.

High Tonnage

Delivers more forage per acre to help maximize your return.

Excellent Winterhardiness

Dependable performance through tough winters.

2024 Markesan, Wisconsin Trials, Tons/Ac @ 35% DM

Built for performance. Proven by results.
