Management Practices

Seeding Rates and Depth

For forage production, target:

- 1.2 to 1.3 million seeds per acre drilled
- 1.3 to 1.5 million seeds per acre broadcast

For best consistency, plant at:

- 1½ inches deep

Uniform depth supports uniform emergence—and uniform stands drive yield. Get out and verify planting depth in the field by checking your drill depth. Do not assume drill settings equal actual depth.

| ✓ Dairy Silage Systems | ✓ Green Chop | ✓ Double-crop System |
| ✓ Beef Grazing & Silage | ✓ Hay Production | ✓ Manure Nutrient Utilization |

Why Grow Kicker™?

Plant Kicker™ for awnless, high-yielding forage with strong straw strength and flexible spring adaptation.

Awnless

Improves livestock acceptance makes Kicker™ a strong choice for grazing, hay or silage.

More Forage, More Value

Produce more feed from every acre, while increasing the overall value of your operation

Medium Maturity

Offers a practical balance between forage quality, yield potential and harvest timing.

Strong Forage Yield

Delivers maximum feed availability and overall value per acre.
