

TriFecta *Alfalfa*™

Agronomics Characteristics

TriFecta is a winterhardy variety with strong yield performance and very good forage quality. TriFecta brings a strong disease and pest resistance package for good defense in protecting its high yield potential. Highly suited to variable soils with its strong resistance to root rot.

Fall Dormancy 5

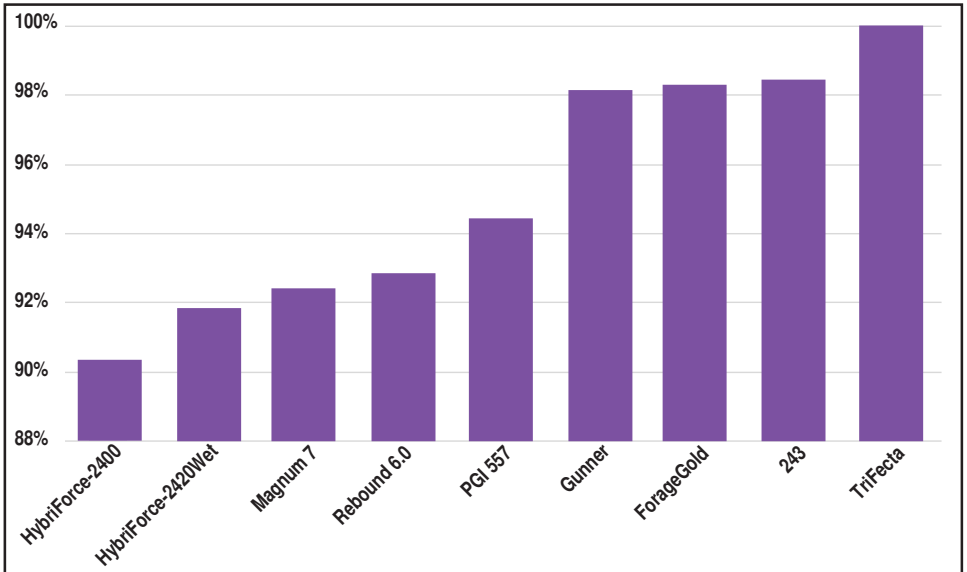

Very winterhardy

Disease resistance index 35

Disease Tolerance

Anthracnose	High resistance
Phytophthora root rot	High resistance
Aphanomyces (race 1)	High resistance
Aphanomyces (race 2)	High resistance
BacWilt	High resistance
FusWilt	High resistance
VertWilt	High resistance
Pea Aphid	High resistance
Spotted Aphid	Resistance
Stem Nematode	High resistance
