Management Practices

Seeding Rates and Depth

For forage production, target:

- 1.2 to 1.3 million seeds per acre drilled
- 1.3 to 1.5 million seeds per acre broadcast

For best consistency, plant at:

- 1½ inches deep

Uniform depth supports uniform emergence—and uniform stands drive yield. Get out and verify planting depth in the field by checking your drill depth. Do not assume drill settings equal actual depth.

Best Uses

- | | | |
|-------------------------|------------------|-------------------------------|
| ✓ Dairy Silage Systems | ✓ Green Chop | ✓ Double-crop System |
| ✓ Beef Grazing & Silage | ✓ Hay Production | ✓ Manure Nutrient Utilization |

Quality that pays.
Valor™ Barley delivers the nutrition and performance livestock producers demand. With strong crude protein, excellent fiber digestibility, and high relative forage quality, Valor helps put valuable feed in the bunk while giving growers a dependable, versatile crop that fits their forage program.

2026 Vernon, Texas Trials
VALOR™ BARLEY DELIVERED

Higher crude protein, fiber digestibility and forage quality over TAM 116 Wheat.
